

## Easily Track Your Valuable Business Assets within Geotab!

Chariot Asset Geotab Integrator service enables fleet managers the ability to track critical and valuable assets within the MyGeotab fleet management platform. Easy to install pre-configured asset tracking devices with cellular connectivity enabling the monitoring. This service supports many types of assets such as trailers, compressors, and forklifts. Now fleet managers can track and monitor not only their vehicles but all of their asset in one single MyGeotab view for:

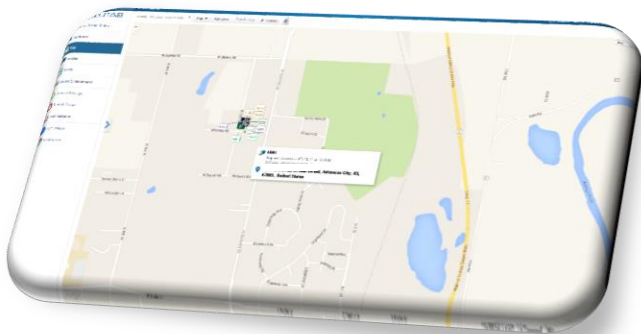

- Theft Prevention** Geofencing and alerts provide instant updates when assets are moved
- Location Service** Always know where your assets are when you need them
- DOT Inspections** Locate your trailer to quickly complete mandatory DOT inspections
- Asset Utilization** Get the hours of operation for maintenance and to optimize underutilized assets
- Custom Monitoring** Door open, low-level and on/off switches are just a few of the additional monitoring capabilities

**GEOTAB**  
management by measurement

## Supply Chain Management with Quick ROI

Investing in GPS tracking services through Chariot Asset Geotab Integrator provides the visibility into your supply chain management by optimizing your operations reducing capital expenditures and operating expenses. This is achieved by increased asset utilization through accurate information to proactively cut costs and maximizing the use of equipment.

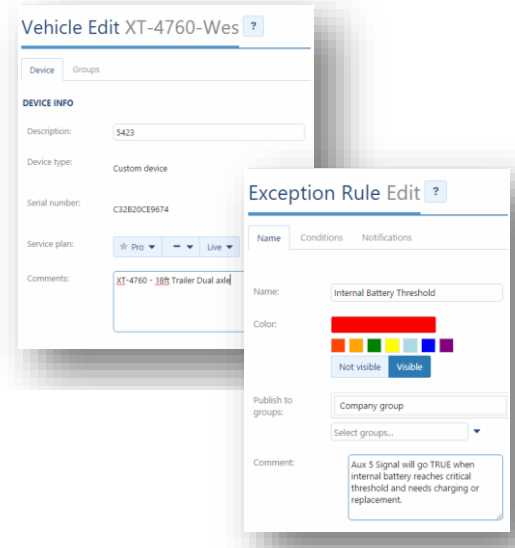

- **Quick & Easy Installation**
- **MyGeotab Asset Integration**
- **Low Monthly Costs**
- **Business Enterprise Data Integration**
- **Solar Powered and Energy Harvesting devices for long life installations**

Utility company after installation on their fleet of over 400 trailers, ***“We would spend literally days trying to locate trailers for daily work or DOT inspections. Now we know exactly where they are saving time and money that has effectively reduced our number of assets through better utilization.”***

Chariot Asset Geotab Integrator facilitates asset and fleet managers to take full advantage of their current Geotab infrastructure. The integration simplifies the effort in managing the assets with tools already offered in MyGeotab. The benefits include:

- See Assets just like other GO devices
- All data in one place for easy integration
- Utilizes the Geotab Notifications tool
- Use Geotab rules engine for alerts for geofencing, low battery, etc...
- Singles-user interface for view for vehicles and assets to optimize asset utilization
