

Easily Track Your Valuable Business Assets and Equipment!

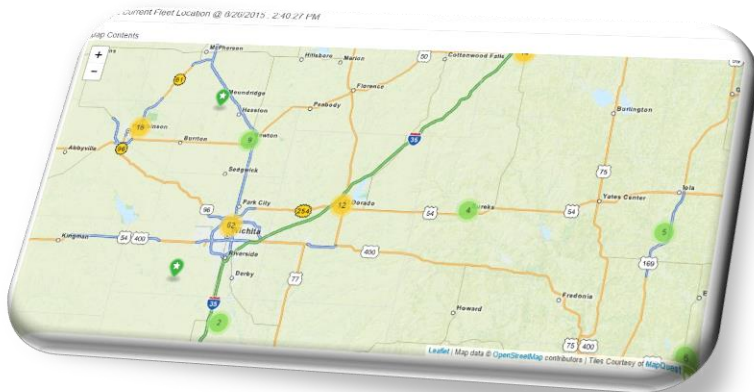

Chariot Asset Tracker service enables businesses to manage their valuable mobile assets with minimal effort, risk or cost. Easy to install pre-configured rugged asset tracking devices utilizing cellular connectivity enable the monitoring of assets such as trailers, compressors, forklifts or any other myriad of assets providing:

- Theft Prevention** - Geofencing and alerts provide instant updates when assets are moved
- Location Service** - Always know where your assets are when you need them
- Asset Utilization** - Get the hours of operation for maintenance and to streamline operations
- Custom Monitoring** - Door open, temperature, level are just a few of the additional achievable monitoring capabilities

Supply Chain Management with Quick ROI (Return-Of-Investment)

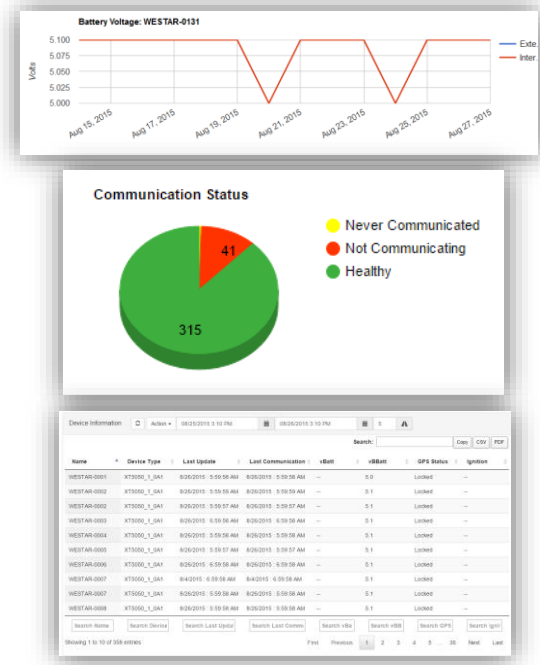

Investing in GPS tracking services through Chariot Asset tracker provides the visibility into your supply chain management by optimizing your operations reducing in capital expenditures and operating expenses. This is achieved by increased asset utilization through accurate information to proactively cut costs and maximizing the use of equipment.

- **Quick & Easy Installation**
- **Low Monthly Costs**
- **Live Web Portal**
- **Business Enterprise Data Integration**
- **Solar Powered and Energy Harvesting devices for long life installations**

Chariot Asset Tracker provides extensive capabilities for reporting and managing the asset tracking devices providing the reliability our customers demand. Items include:

- Battery Voltage and Communication Statistics
- Historical Charting reveals trends in status and usage
- Mapping (most recent location, breadcrumbing, geofencing)
- Remote device management provides easy offsite configuration of devices
